Order from SLA \$1.60 62-18096

Trans. of Denki Tsushin Gakkai Zasshi (Japan) 1961,
v. 44, no. 5, p. 811-814.

DESCRIPTORS: *Transistors, Resistance, *Switches,
Field emission, Design, Manufacturing methods,
*Negative resistance circuits.

This article deals with the structure of one type of
field effect transistor as a negative resistance device;
its principles of operation, method of design and
production, the basic properties of the finished
product, its advantages and uses. This structure also
shows that it is identical with the very narrow base
of an alloy-type transistor equipped with a ring base.
The production mechanism of the negative resistance
characteristics which appear in the gate circuit, is
